

## Project Design Phase

### Problem – Solution Fit Template

Date	25-06-2025
Team ID	LTVIP2025TMID52343
Project Name	<b>DocSpot:</b> Seamless Appointment Booking for Health
Maximum Marks	2 Marks

#### Problem–Solution Fit Summary:

The Problem–Solution Fit confirms that **DocSpot** is genuinely addressing the real challenges experienced by both patients and healthcare providers when it comes to booking medical appointments. This step is crucial before taking the platform to a larger audience.

---

#### Objective:

- Make the appointment booking process simpler and quicker.
- Offer a unified platform where healthcare providers can manage their schedules without confusion or delays.
- Help patients get timely access to doctors through smart search and efficient booking features.
- Improve communication through automated reminders, reducing missed appointments and last-minute cancellations.

---

#### Problem Statement:

Patients and medical professionals currently deal with several issues such as:

- Booking appointments is often complicated and takes too much time.
  - There's no central system to manage schedules, leading to overlapping bookings or missed slots.
  - Poor communication tools mean many patients forget their appointments, resulting in high no-show rates.
  - Finding the right doctor or available specialist can be difficult and time-consuming.
  - Managing appointments across different platforms or locations is frustrating and inefficient.
-

## **Proposed Solution – DocSpot:**

DocSpot offers a seamless appointment booking platform with:

- A powerful search tool with filters like specialty, location, and availability to help patients find the right doctor quickly.
- Live calendar access for doctors and clinics to manage their schedules in real-time.
- Automated reminders and alerts to patients to reduce missed appointments.
- Secure user accounts with saved appointment history and user preferences.
- Virtual consultation options through telehealth features.
- Admin dashboard for managing healthcare providers, appointments, and generating useful reports.
